Enriched GO biological processes
ISG15−protein conjugation
cellular response to misfolded protein
establishment of endothelial intestinal barrier
negative regulation of ferroptosis
negative regulation of viral genome replication
peptide antigen assembly with MHC class I protein complex
phagosome−lysosome fusion
positive regulation of TORC2 signaling
positive regulation of natural killer cell chemotaxis
protein localization to endosome
regulation of nuclear−transcribed mRNA catabolic process, nonsense−mediated decay
respiratory burst
